

## PHAR 391 - Pharmacist Mentor Discussion

Student Name: \_\_\_\_\_

Pharmacist Mentor: \_\_\_\_\_

Date of Student-Mentor Discussion: \_\_\_\_\_

*Mentee Directions:* Come prepared to your mentor meeting with a copy of this document. Please **review the questions ahead of time** and **prepare 2 goals for your next set of IPPEs** (see question 6) that you'll discuss with your mentor.

*Mentor Directions:* Your mentee is in the middle of, or has just completed, their first semester of professional pharmacy education. For some, the IPPE hours this semester were their first exposure to pharmacy in the real world. The objective of this meeting should be to help the students evaluate their first experience. Please **discuss** and **document** the following questions with the student.

1. What are your experiences in pharmacy so far? Have you worked in the past or were IPPEs your first exposure to pharmacy in the real world?
2. What skills did you observe or learn during your practice experience this semester?
3. How could your practice experience have been improved?
4. What could you have done better during your practice experience?
5. In what ways have your experiences this semester (in the classroom, at work, or on your IPPEs) changed your perception about pharmacy or the healthcare system?
6. What 2 goals would you like to set for your community practice experience next semester? Your goals need to be personal, specific, measurable, and realistic.
