Additional Information that NM Students May Find Helpful	
We are a not for profit organization and therefore are not consumed with pushing patients in and out of our doors to earn a buck.	
What does this mean for the student? Well, one it means we can actually slow down for training purposes and spend more one-on-one time with the student. Secondly, it provides a lesser stressed environment which students appreciate when trying to learn and gain experience. Third, it means you will get lots of hands-on type of training because you can easily move around from one procedure to the next without missing a whole lot in between.
