

How To Set Up The University of Findlay Automatic Proxy Configuration Script

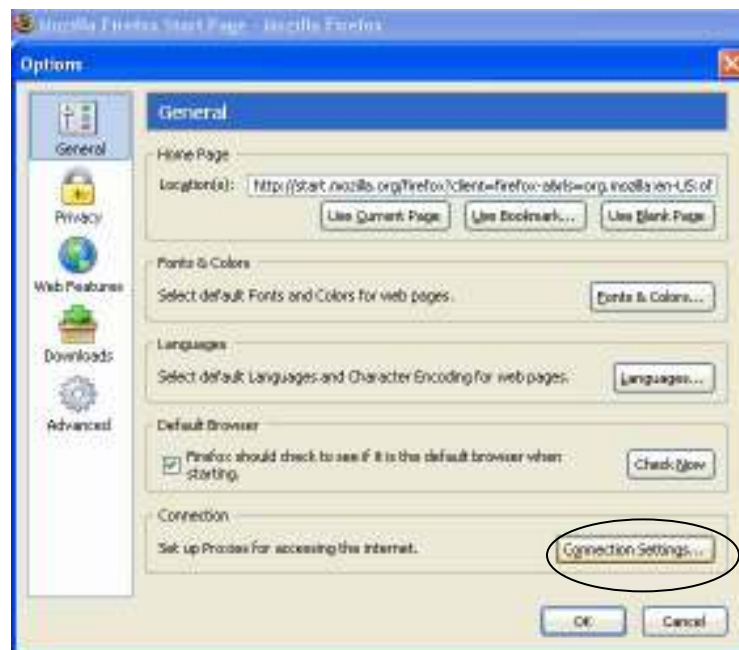

* Download Mozilla Firefox 1.0 at <http://www.mozilla.org>

1. You must be connected to The University of Findlay VPN for this script to work.

- Open Firefox
- Click on the *tools* menu and select *Options...*

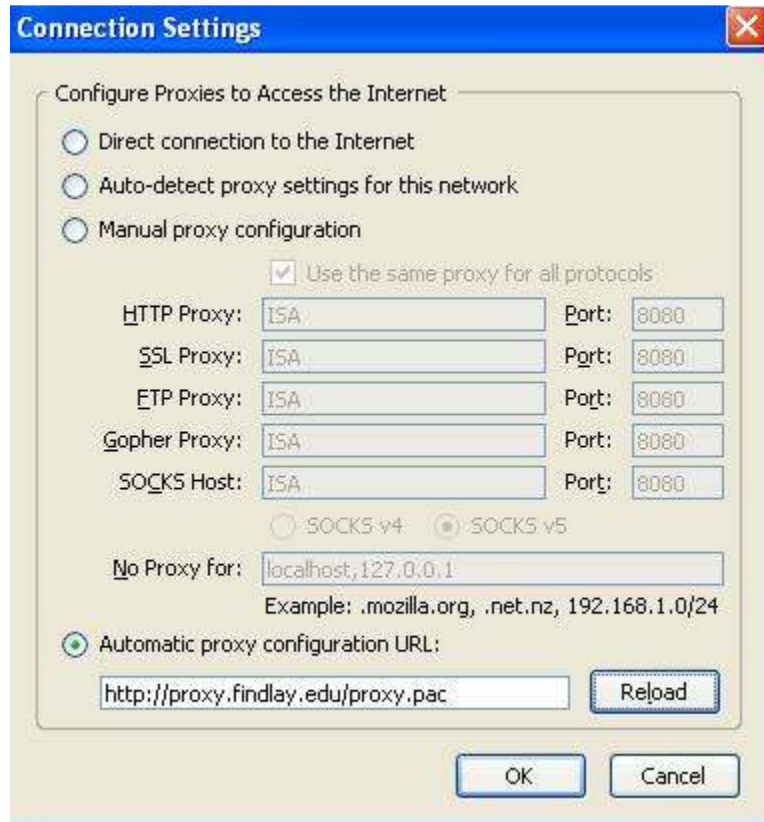

2. At the *Options* window, in the General tab, click on the *Connection Settings...* button.

3. Once into the connection settings, select the *Automatic proxy configuration URL:* button and type the following address:

http://proxy.findlay.edu/proxy.pac

4. Click **OK** at the Connection Settings window. This takes you back to the *Options* window. Click **OK**, once again.

You can now connect to the online databases!
