

## NURSING (BSN)

### Program Overview

The Bachelor of Science in Nursing Program prepares students to implement holistic, patient-centered care that reflects an understanding of human growth and development, ethics, pathophysiology, pharmacology, and nursing management across the health-illness continuum, the lifespan and in various healthcare settings.

Our program implements evidence-based nursing interventions as appropriate for managing the acute and chronic care of patients while promoting health and wellness. Students will be prepared to work with an interdisciplinary team of health professionals to positively impact patient outcomes.

### Program Highlights

- Newly renovated and expanded Nursing classrooms
- Small class sizes: classes with no more than 30 students, 8:1 student to instructor ratio in clinical setting, 10:1 student to faculty ratio in skills lab
- On-campus nursing simulation lab combined with a variety of clinical sites and patient care with experienced educators supports the development of well-prepared nurses
- Interprofessional education opportunities with our vast number of Healthcare Programs offered at The University of Findlay
- Strategic College Credit Plus completion could lead to a BSN degree in 3 years
- Opportunities for study abroad with Fukui Prefectural University in Japan

### WHY NURSING?

Nursing students enjoy close faculty and cohort relationships that often extend into networking opportunities with area healthcare providers. Hands-on experiences combined with higher than average clinical hour requirements ensures our students are not only equipped to serve but also sought-after by prospective employers.

### ABOUT OUR FACULTY

Full-time Nursing faculty have over 50 years of combined nursing experience across many areas of nursing, including medical-surgical nursing, critical care, neurology, cardiac care, pediatrics, home health & hospice, dialysis, and intraoperative surgical nursing.
