

April 12, 2023

Hello Clinical Faculty,

We appreciate your preparation for your student by completing the training for the **PT Clinical Performance Instrument (CPI) 3.0**. We believe this tool will decrease your time spent with summative evaluations of your student(s).

This version of the CPI tool has improvements over the second version, including:

- Reduction in performance criteria from 18 to 12
- Same descriptive rating anchors, but improved rules to determine accurate ratings

The **CPI 3.0 training** include a narrated video, approximately 20-28 minutes in length. The videos allow participants to pause or rewind but does not allow them to fast forward.

The assessment has 21 questions. Participants must score a 100% on the assessment to receive their certificate of completion. The assessment can be taken as many times as needed to achieve the passing score.

It's advisable for both SCCEs & CIs to complete the **CPI training**. However, CIs assigned to mentor our DPT students must complete the training via the link, https://learningcenter.apta.org/p/CPI-3_CI-SCCE **PRIOR** to the CE placement start date.

The CPI 3.0 utilizes the APTA SSO. Because of this, all users will need to have an APTA account. This does not mean that users need to be APTA members. If a user already has an APTA account, they do not create a new one. Users can contact APTA Member Success to obtain their account information. If a user does not have an APTA account, they can create a **free APTA account**. The email address used and/or the APTA number received during account set-up will be required for completing the spreadsheet. Users can obtain their APTA number by logging in to www.apta.org, clicking My Profile, and locating the APTA ID number at the top of the My APTA page.

Ohio CEU application has been submitted and is pending approval. **Additional CPI information** can be found on the Ohio Kentucky Consortium of Physical Therapy website: <https://www.okptce.com/pt-cpi-3-0>.

Please let me know if you have questions or concerns regarding your ability to complete the CPI training by the start of the scheduled CE experience.

Thanks, Dr. Debbie George, Dr. Stefanie Anderson, and Ms. Amy Persson
