

July 27 Campus Update Regarding Daily Health Assessment Tool

As referenced in the Oiler Start Safe & Stay Safe Plan, the University has developed a Daily Health Monitoring Tool for use by all employees and students. The tool is available now, and we would ask that all employees and students begin using it on Monday, July 27, so you become familiar with it. You can find the tool on the main screen of the OilerMobile app or in the right-side navigation of the Oiler Start Safe. Stay Safe page: <https://www.findlay.edu/oiler-start-safe-and-stay-safe/>.

When you click on the link for the tool, you will be prompted to enter your UF email address (xxxxxx@findlay.edu), and will then be taken to a page to enter your password. You will be asked to complete the COVID-19 screening questions and will get an email confirmation when you submit your answers. Since you are logged in, the form automatically captures your name so you don't have to enter it. The information entered in the form is viewable only by the Cosiano Health Center to ensure HIPAA compliance. You will need a thermometer to take your temperature each day to use the tool, so please consider purchasing one if you do not already have one.

Providing a COVID-19 test result to UF prior to the start of classes is not required, but if you have symptoms or have been around anyone who did test positively, we would ask that you be tested. Should you have a test done prior to arriving on campus due to symptoms or exposure, please notify the Cosiano Health Center of the test date and result so they can follow-up as needed.

Thank you for doing your part to keep our campus community healthy.
