

October 14 COVID Case Data Update

To the UF Community:

Thank you to everyone who participated in the COVID pop-up testing last Friday. If you provided your email address at the time of testing, you should have received an email from Mako Medical (no-reply@makomedical.com) to access your results. Please check your junk email folder as it may have been diverted there. Here are the overall results from last week:

- 349 people were tested (approximately 23 were community members)
- 5 people tested positive (2 community members and 3 UF people)
- 3 test results were inconclusive
- 341 tests were negative

These are excellent results, and they are due in large part to everyone's efforts to utilize face coverings and practice physical distancing. As a reminder, free COVID testing will again be available from 1-5 this Thursday in Koehler.

David Emsweller

Vice President for Student Affairs
