

August 6 COVID Vaccination Survey Information

To the UF Community:

Given increased COVID cases due to the Delta variant as well as changes in CDC recommendations, the University of Findlay is requiring the following from all students, faculty, and staff:

- In order to assess the level of COVID vaccination within the UF community, we need all students and employees to complete the survey available at <https://bit.ly/3jtvi16> by **Tuesday, August 10th**. You will need to enter your full UF email address on the first screen, and will then be taken to a UF screen where you will enter your UF email address password. You will then be asked to authenticate, and will be taken to the survey screen. These are the screens you will see (please use your UF email address – the one shown in the following screens is for illustration purposes only):

We've sent a notification to your mobile device. Please respond to continue.

Given increased COVID cases due to the Delta variant as well as changes in CDC recommendations, the University of Findlay is requiring all students and employees to complete this brief survey by August 10th so we can assess the level of vaccination in the UF community. The University is not requiring a person to be vaccinated, but is requiring the completion of the survey. If the number of students, faculty & staff who are vaccinated is deemed to be at an acceptable level based on information from the Health Department and CDC, we can potentially avoid having to apply restrictions. Thank you for your assistance.

Welcome David Emswiler

Have you been vaccinated for COVID? *

Have you tested positive for COVID at any time? *

Submit

- The survey asks you to disclose whether or not you have received one of the COVID vaccines.

- If you have been vaccinated, you will be asked to upload a proof of vaccination which will be verified by the Cosiano Health Center.
- If you have not been vaccinated or prefer not to disclose your status, you will be required to submit proof of a negative COVID test result prior to the first day of classes (August 16th). The COVID test needs to be done during the week prior to classes beginning, and the results must be submitted to the Cosiano Health Center prior to classes beginning. Tests are available at Cosiano as well as at many local pharmacies. Additional testing may be required throughout the semester depending on the changing situation.
- The survey response rate and our campus community vaccination rate will help us to determine if face coverings or other measures (e.g. physical distancing, limiting events...) will be required when classes begin. Given that, it is extremely important that everyone complete the survey.

The University is **not requiring** a person to be vaccinated, but is **requiring** the completion of the survey. If the number of students, faculty & staff who are vaccinated is deemed to be at an acceptable level based on information from the Health Department and CDC, we can potentially avoid having to apply restrictions.

By assessing the current level of vaccination in the UF community, encouraging vaccinations, and utilizing COVID testing, our hope is that the live classes, events, and activities everyone has been looking forward to will take place this fall semester.

If you would like to access any of the other campus updates that have been sent out over the past months, please visit the [Coronavirus Disease \(COVID-19\) Information](#) web page. Links to all updates are located in the Campus Communications section. If you have questions, please email them to coronavirus@findlay.edu. Additionally, we would encourage you to download the Oiler Mobile App (available at App Store and Google Play), and enable push notifications. Thank you for help and support.

Regards,

David Emsweller

Vice President for Student Affairs and Enrollment Management
