

NMI Applicant Questionnaire: New Applicants

Thank you for your interest in the Nuclear Medicine Institute (NMI)!

We are excited to learn more about you, including why you want to be a part of the class and what you know about the field of nuclear medicine technology. Your answers to the questions below will help us accomplish this, and also will play a role in which applicants are offered seats in the class.

Please remember, this is part of the application process and without this information we may be unable to offer you a seat in the class.

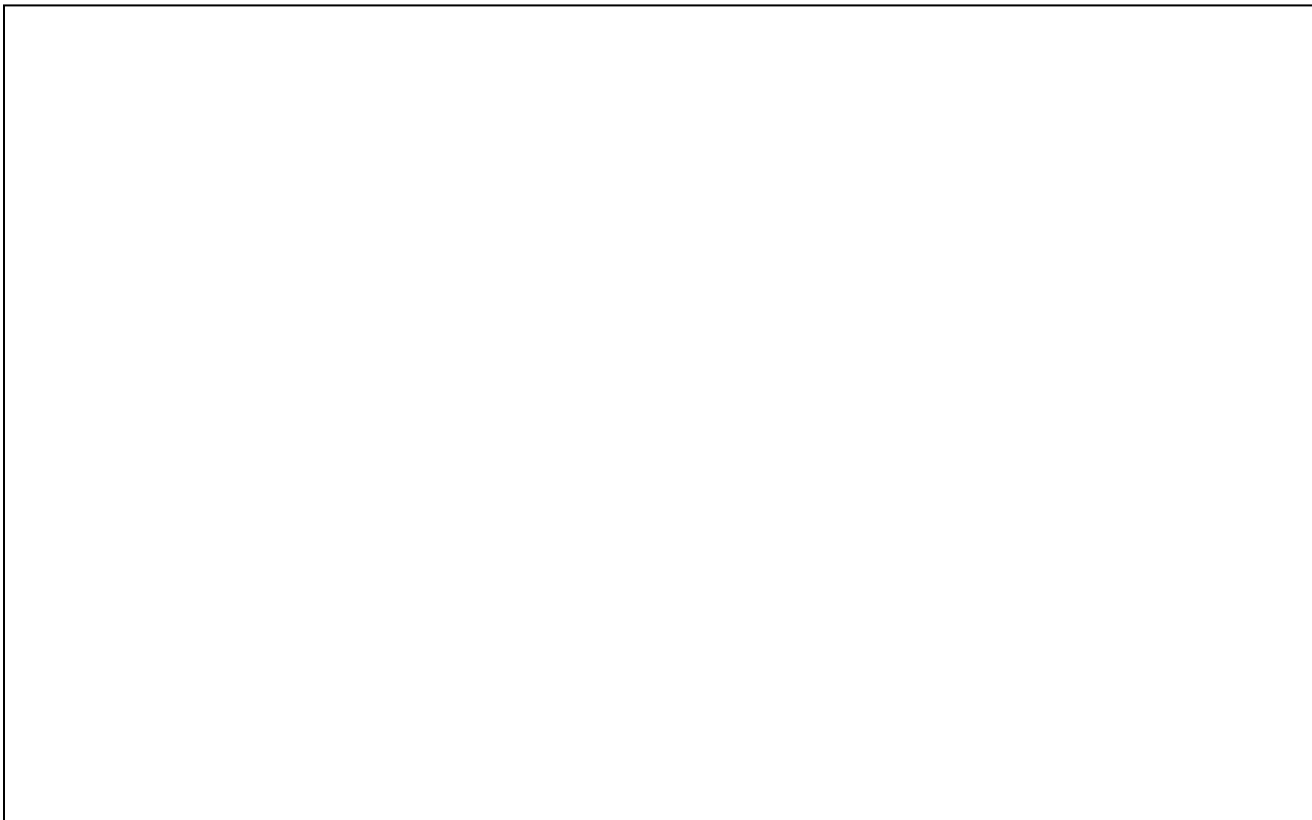

Answers should please be 100 – 500 words in length, depending on the question.

1. In your **own** words, please describe what nuclear medicine is. How would you explain nuclear medicine to a patient, for instance? Again, please use your own words—**do not copy** a definition from a website or dictionary. We simply want to know where your knowledge level is currently.

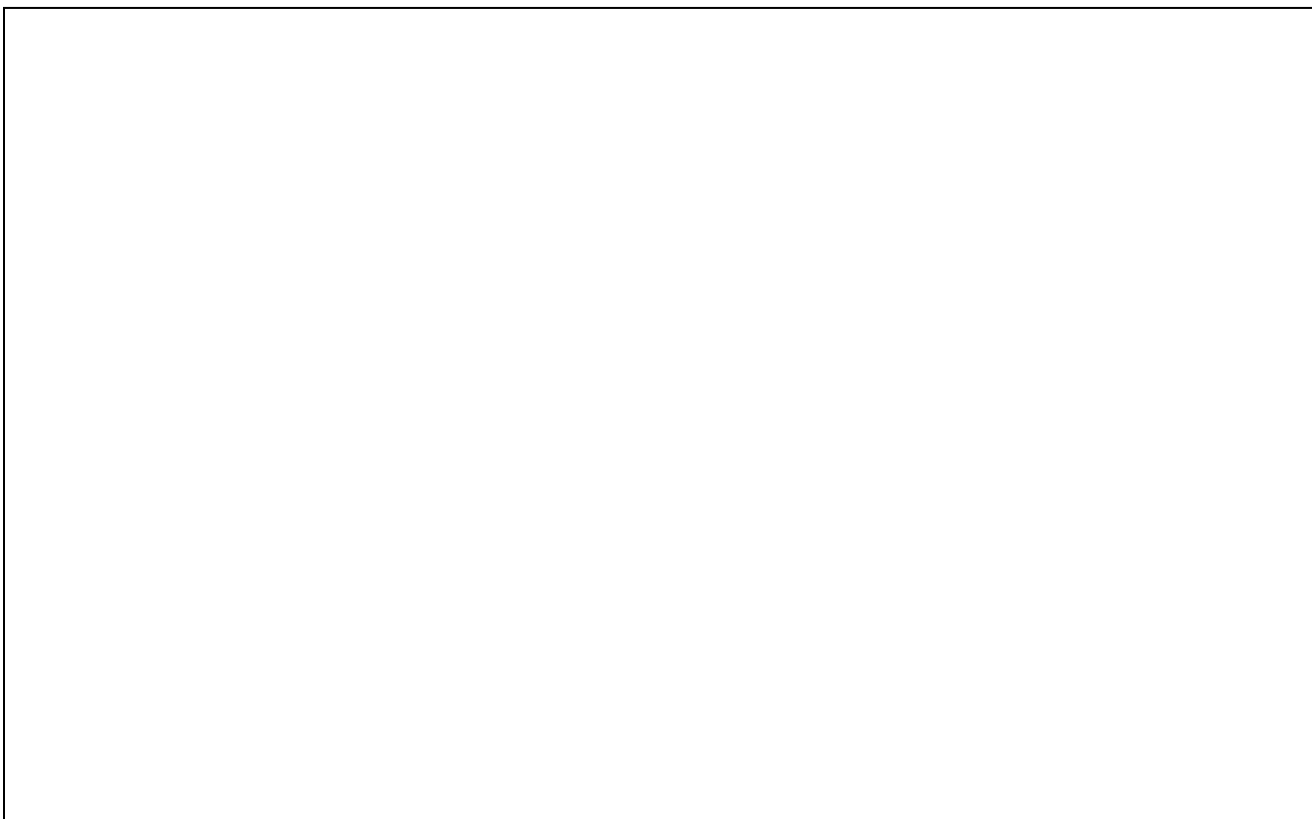

2. Why did you choose to apply to the Nuclear Medicine Institute versus another nuclear medicine program? Tell us about your path to NMI. **If you are coming from an affiliate school, please also name the affiliate here.**

3. What personal qualities and/or professional qualifications do you have that would merit a seat in this NMI class?

4. Tell us about a time when you provided excellent customer service. How might this translate into excellent patient care, or being an excellent technologist?

5. What steps have you taken to prepare for NMI?

6. After letters of conditional acceptance are sent out, we will send you a form with available clinical sites and ask you to indicate your top five choices. From there, we will assign a site to you and provide contact information for the clinical supervisor so you can set up an interview.

Knowing that interviews and site placements are competitive, what steps do you plan to take to prepare for your clinical site interview?

7. Please list the NMI cohort to which you are applying. **Spring or Fall? Which year?**

This will be the first semester that you may attend NMI (if accepted), followed by two semesters of clinical training. If not accepted for this cohort, you may request to be considered in a later cohort. If you have not completed all prerequisite courses, **please provide below a tentative outline** for when you plan on completing these courses. If you have not completed an adequate course in human anatomy (with lab), human physiology (with lab), general chemistry (with lab), general physics, college algebra, English composition, and medical terminology by the first day of NMI classes, you will be removed from the program at that time.

8. Have you ever been brought up on charges of Academic Dishonesty or been accused of cheating in any University or College setting? If yes, please explain.

“I understand that demonstrating Honesty and Integrity is critical throughout the entire NMI program, beginning with this application and continuing throughout my time in the classroom as well as during clinicals.

As such, I attest that all answers above are my own work, based on my own ideas and present knowledge. I understand that falsification, plagiarism, and/or any other practice deemed as Dishonest or demonstrating a Lack of Integrity at any point throughout the NMI program, including on my application and/or this questionnaire, would be grounds for immediate dismissal.”
